

Nitrile-coating now on a seamless cotton liner for increased comfort.
For use in abrasive environments with wet or dry conditions.

TECHNOLOGIES INSIDE

CLEANLINESS GUARANTEED

We use our HandCare® Program for every single ATG® product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be “Fresh out of the pack” which is certified by Oeko-Tex® according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG®,s full range of gloves are “dermatologically safe” and the science and research behind them is robust.

More information about HandCare® by ATG® is available at www.atg-glovesolutions.com.
