

# MaxiCut®

proRange®

MaxiCut® combines cut protection with comfort, flexibility and dexterity for dry environments.

Certified to be washed.  
CLEAN, FRESH AND COST EFFECTIVE

## TECHNOLOGIES INSIDE

For protection against cuts

**Innovative fibres** - CUTtech® combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

**Reinforcement** - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

Delivering 360° breathability

**360° breathability** - Our patented micro-foam coating channels moisture and heat away from your skin to maintain an optimal hand temperature so you can work productively.

For a greater cooling effect look to use our AD-APT® Technology which works in conjunction with AIRtech®.

For reduced hand fatigue

**Form, fit and feel** - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

**Latest knitting technology** - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

**Consistent liner penetration** - from the nitrile, leaving only the soft liner resting against the skin.

For better performance

**Optimized grip** - delivered through our micro-cup finish, allows for a controlled grip. GRIPtech® decreases hand fatigue and increases safety.

## CLEANLINESS GUARANTEED

We use our HandCare® Program for every single ATG® product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex® according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG®'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

More information about HandCare® by ATG® is available at [www.atg-glovesolutions.com](http://www.atg-glovesolutions.com).
